Petition for Rule Change

Dale E. Reich  
141 North Center Street  
Seville, Ohio 44273

**RM Number** \_\_\_\_\_

Telephone (330) 769-3071

---

This proposal to make the license terms for all present 5 years term Commercial Radio to a 10 years term in the Marine Operators, GROL, and Radiotelegraph sections of For 47 CFR sub part 13 Rules and Regulations.

All lifetime licenses would remain the same with no change.

The FCC would also include wording on the face of all new issued Commercial Radio Operators Licenses and Permits to including to the effect or of sorts.

“The Licensee is responsible to notify the commission of any change of permanent address or legal address.” The commission should have the final say as to the sort of test wording to fit there format.

The FCC would be allowed to collect from the applicant through the Commercial Examiners process a reasonable fee to support the FCC computer on all passed Exams in addition to the current exam fees of today.

This should be addressed as an FCC administrative fee, paid by the applicant to the commission to offset the government computer costs.

The FCC would allow the Commercial Examiners, to process renewals of collect the FCC fees along with a small charge for assistance they provide the licensee. The Commercial Examiner would transfer the government fees direct to the FCC. The Commercial Examiners could provide help with administrative type of up-dates as is common in other radio services for a small fee.

List ABCDE

A fee of perhaps \$12.00 for all new or upgraded commercial exams that were passed and sent for processing collected by the CE relayed to the FCC with application would be a fair offset. Perhaps the FCC would set some kind of share of fee splitting with the CE for they are doing the bulk of entry into the system should be investigated.

A fee for customer service in assistance for an administrative update by any of the CE Perhaps could be in the area of \$25 to \$35 for renewal, change of Address, or other simple issues.

No one likes the government to collect more taxes or funds, however the matter of life time licenses and permits in commercial radio should be addressed with a small initial fee to help support the cost of the data base used to keep it.

A simple short form application like the VE system in amateur radio should be adapted To commercial radio renewal and administrative up-dates through authorized CE vendors to make it simple as a sign, pay a reasonable fee to the CE, and they process to FCC.

All present Private Exam Fees format should not be changed only the addition of New Additional Services should be addressed.
